

### **A message for our 40th anniversary**

*These pages tell a story that belongs to everyone who has helped build Nanosystems over the past forty years: employees, customers, partners, friends, and families.*

*Looking back on our journey, we have come to realize that a company's value is measured not only by its achievements, but also by the positive impact it creates. For this reason, we support initiatives dedicated to young people, our local community, and people's well-being, with a commitment to continuing this effort in the years ahead.*

*We have always believed that people's well-being is the true key to success. This belief is reflected in our motto, "putting people at the center of everything we create", and is also represented in our logo: the orange dot, symbolizing the individual, placed at the center of a blue circle that symbolizes a team united in supporting and empowering people through technology.*

*Thank you for sharing these first 40 years with us.*

*Silvia & Romana*

## **Our journey: Past, Present, and Future**

It was 1986 when Nanosystems took its first steps, at a time when information technology was just beginning to enter businesses and organizations. Back then, our work focused on helping customers manage their first IT infrastructures, providing technical support, consulting services, and innovative solutions for the time.

Since then, technology has never stopped evolving, and we have chosen to grow alongside it. Over the years, we transformed our business model, moving from hardware sales and support to the development of software and advanced digital services. This evolution led us to create proprietary solutions for remote access, data backup, and IT infrastructure management.

Today, we continue to develop reliable and accessible solutions with a simple yet meaningful goal: to use technology to simplify people's work, support organizational growth, and create value for the community.

## **Nanosystems Today**

Nanosystems Srl is an Italian company specialized in the development of software solutions and digital services for IT infrastructure management.

Today, we support businesses, professionals, and organizations in working more efficiently, securely, and effectively by providing technology designed to simplify everyday operations.

Led by Silvia Gigli and Romana Romandini, Nanosystems combines technical expertise, strategic vision, and a people-centered approach, supported by an innovation-driven organizational structure built around specialized functional teams.

# OUR HISTORY

## Company development timeline

## What guides us every day

Mission	Vision	Values
We develop and deliver high-quality software for IT teams, MSPs, and private users.	Empowering people through simple, accessible, and affordable technology.	Innovation • Reliability • People-centered approach • Responsibility

Our goal is to connect and empower people by leveraging internal talent, fostering collaboration with consultants, and supporting initiatives that promote social well-being.

Among the values that guide our activities, the following stand out:

- Technological innovation
- Reliability and service quality
- People-centered approach
- Responsibility and sustainability

## Recognitions that reflect who we are

- **Legality Rating**, recognizing our commitment to transparency, ethical business practices, and compliance with legal standards.
- **Gender Equality Management System**, demonstrating our commitment to promoting an inclusive, fair, and merit-based work environment that values individual skills and talents.

Certification	Organization	Year	Description
Legality Rating ★++	AGCM	2024	Commitment to transparency, ethical conduct, and compliance with legal standards
Gender Equality UNI/PdR 125:2022	RINA Services S.p.A.	2025	Gender equality management system promoting an inclusive and fair workplace

*Certifications obtained*

## Beyond Business

At Nanosystems, innovation also means contributing to the growth of people and the community in which we live. Over the years, we have supported initiatives focused on young people, personal well-being, and our local area, with the goal of creating a positive impact that extends beyond our business activities.

Among the projects we have chosen to support in recent years are:

-  **Nanosystems Connect:** Talent and technology for young people
-  **PlayMind:** Well-being and growth through sport
-  **IOM:** Psychological support for cancer patients
-  **Nessun Dorma APS:** Supporting children and their families
-  **Un Pasto Buono (A Good Meal):** Practical support for the community

## Looking to the future

For forty years, we have embraced change with the same spirit that inspired us at the beginning of our journey: curiosity, passion, and trust in people.

Technology will continue to evolve, but what will never change is our commitment to building simple, reliable, and accessible solutions, always putting people and the relationships that make every achievement possible at the center of everything we do.

Thank you for being part of our story.
